10th Scandinavian Conference on System and Software Safety
November 22-23, 2022, Gothenburg

Call for Presentations: Systems, Software and Safety 2022

System and software safety is becoming increasingly important in many industries and in critical societal infrastructure. Systems are becoming ever more complex, connected and autonomous and the software continues to grow. This poses many challenges even for mature organizations, requiring approaches that go beyond established best practices. Many organizations face the same kind of challenges, making the sharing of ideas and experiences essential.

The Scandinavian Conference on System and Software Safety has become a central meeting place for Scandinavian safety experts from industry, public and academic organizations. The conference is an opportunity to network and make new contacts. There will be a plenary overview day, and a second day with parallel sessions. The parallel sessions will be in depth workshops and tutorials about different challenges, techniques, standards and methods. As for the previous years, we anticipate a well-balanced mixture of participants with presentations from different industries and academia.

We would like to invite proposals for presentations and workshops on safety-related topics. In this year's conference we will have a special focus on **Safety and Cybersecurity**, but proposals for presentations on other topics are also welcome – including safety as related to public infrastructure, artificial intelligence, agile development, design- and architectural decisions, functional safety, autonomy, and quality assurance.

You are invited to propose presentations and workshops via http://safety.addalot.se/2022

The call for presentations ends **April 24, 2022**.

Program committee

- Fredrik Asplund, KTH (Chair)
- Olof Bridal, Volvo Group
- Barbara Gallina, MDU
- Jennifer Horkoff, Chalmers|GU
- Per Johannessen, Volvo Group
- Even-André Karlsson, Addalot
- Malin Levin, Chalmers|SAFER
- Jesper Lindell, Combitech
- Peter Sandberg, Alstom
- Staffan Skogby, Pictor Consulting AB
- Miroslaw Staron, Chalmers|GU
- Martin Törngren, KTH
- Angela Wallenberg, Saab
